RECENT EXPERIENCE

Machine Learning Engineer

NPmatic GmbH

📅 Jul 2025 – Nov 2025

📍 Berlin, Germany (remote)

Combined LLM engineering with multimodal learning for a fintech & enterprise analytics startup.

- Designed hybrid LLM + multimodal architectures for analyzing complex reports and live presentations, providing automated QA.
- Built E2E RAG pipelines for corporate analytics (data ingestion, chunking, embeddings generation, tuning & indexing into a vector store, vector search, reranking), implemented hybrid retrieval strategies, integrated with LLM inference for factual grounding.
- Fine-tuned LLMs and multimodal backbones for project needs using PEFT and other methods.
- Implemented inference optimization techniques.
- Established model serving and various MLOps practices.
- Deployed microservices on cloud infrastructure, participated in PoC > MVP cycles by building demos, integrated agentic workflows.
- Developed reusable components combining LLM reasoning with vision/audio modules.

Data Scientist, ML Engineer & Python Developer

Freelance

📅 Jun 2024 – Nov 2025

📍 Various places

Worked as a full-time freelancer.

- Designed/implemented/refined/deployed ML systems.
- Handled data-related problems: collection, processing, transforming, modeling, visualization, analysis, etc.
- Developed various automation software.

Middle Data Analyst

Remokate

📅 Jul 2023 – May 2024

📍 Tbilisi, Georgia (remote)

Worked with analytics in a recruitment agency that connects top IT talent with leading companies in Russia and abroad.

- Designed, monitored and interpreted key business and product metrics.
- Wrote and optimized SQL queries for large datasets.
- Built and maintained interactive dashboards (DataLens, Tableau).
- Conducted hypothesis testing and A/B experiments, measured impact on core metrics.
- Performed cohort, funnel and factor analysis to understand user behavior, retention and conversion trends.

EDUCATION

B.Sc. in Applied Mathematics & Computer Science

Novosibirsk State Technical University

📅 2019 – 2023

STRENGTHS

SWE – Python, C++

Data wrangling – Pandas, NumPy, BS4

Data analysis – Plotly, Seaborn, SciPy, Matplotlib

DL & classical ML – TF2, Keras, Sklearn

Cloud & big data – PySpark, AWS

Databases – PostgreSQL, SQLite

Misc – Docker, Linux, frontend (TS, React)

Analytical thinking

Strategizing

Adaptability & flexibility

Eye for detail

OTHER EXPERIENCE

Python/Web Developer & Data Analyst

📅 Nov 2019 – Jul 2023

📍 Russia (remote)

Gained experience through various short-term remote roles and freelance projects (mostly freelance.habr.com).

- Built Python software: automation scripts, web scrapers and Telegram bots.
- Gathered data and performed data processing.
- Managed PostgreSQL databases for collected data.
- Implemented simple data pipelines.
- Designed and developed KPI dashboards and other analytical tools.
- Designed landing pages, blogs and promotional web pages.
- Implemented frontend using React.
